## 2. Charging of the account at [promosms.pl](https://promosms.pl) website

Click the link in the left menu “Faktury i płatności” (“Invoices and payments” – translator’s note) and then “Doładuj konto” (“Top up your account in cash” – translator’s note). In the next steps, fill in the contact details for the VAT invoice and other required data for verification. The whole process is omitted in this manual.

## 1. Activation of API service at promosms.pl website

Another important element of configuration of promosms.pl account is setting and activating of API function, which enables connection of the script from burze.dzis.net with promosms.pl.

In order to activate::

1. Enter "Ustawienia interfejsów" ("Interface settings" – translator's note), and proceed to „HTTPS API”.

2. Click on the "Użytkownicy API" ("API Users" – translator's note) tab and click the blue square on the left side of the window (under the "Ustawienia" ("Settings" – translator's note) tab).

3. In the „Dodawanie nowego użytkownika API” (“Adding New API user” – translator’s note) form, enter your new API login and password and then click button „Zapisz” (“Save” – translator’s note). The login will be webapi\_yourAPILogin. Chosen login and password for API option will be used later at burze.dzis.net.

Creating of API account has been finished.

### 3. Configuration at burze.dzis.net website

After creating an account at promosms.pl website, the configuration of account at burze.dzis.net is a next step to be proceeded.

- a) Log in into the account
- b) Click “configuration” link placed in the right-hand side of the website.

| [Configuration](#) | [Log out](#)

- c) Next at the bottom of the page – in “login/e-mail” space – login and password to the account at promosms.pl

At that point, the following option is available under “provider and SMS message type”: “PromoSMS.pl – EkoSMS”.

The space captioned “telephone number” requires a telephone number (digits only) at which severe weather alert messages will be sent.

Additionally, option labeled “no severe weather alerts at night” can be chosen. Click “save” .
